In this section you can find the link to our Mediterranean landscape image dataset, nicknamed FESB MLID. "FESB" is a Croatian acronym for the "Faculty of Electrical Engineering, Mechanical Engineering and Naval Architecture", while " MLID" stands for "Mediterranean Landscape Image Dataset".

FESB MLID dataset currently consists of 400 images of natural Mediterranean landscape, as well as their hand-labeled segmentations (i.e. ground truth (GT) images).

Users can download images from here . ***These datasets are free to use, but if you intend to use them in scientific research, it is necessary to reference this webpage and the Center for Wildfire Research***
